Our device is made for gun and ammunition testing. BC7-GM can take several hundred shots before going through revision. Maximal weapon calibre is 308 win. No mounting needed to extend stability.

Bulletproof backpack "My Life III"

We are proud to introduce our new product, a "bulletproof backpack".

The backpack is developed and designed for daily use to carry all necessary books, laptops etc., and provides the maximum level of protection and safety. It weighs slightly more than normal backpacks. We have introduced two models as of now:-

1/ A bulletproof backpack

2/ A bulletproof backpack changeable into the bulletproof vest within 3sec. High level of protection!
"My life" backpack is tested and certified by against a 357 Magnum, .44Magnum, 9mm and 45mm with level IIIA protection.

The backpack features a waist strap with ballistic protection and padded shoulder straps, which evenly spread the weight while increasing comfort and eliminating pressure points and friction.

Our backpacks are not only for students, they are for everyone who values safety, wants to enhance their level of the confidence and actively protect themselves against danger.

We can't stop the violence, but we can give you a chance!

Ballistic resistance : IIIA

The weight : 2490g

Dimensions : 48x29x22

Material : CORDURA DuPont

Volume : 25L
